COMPANY
PROFILE

01

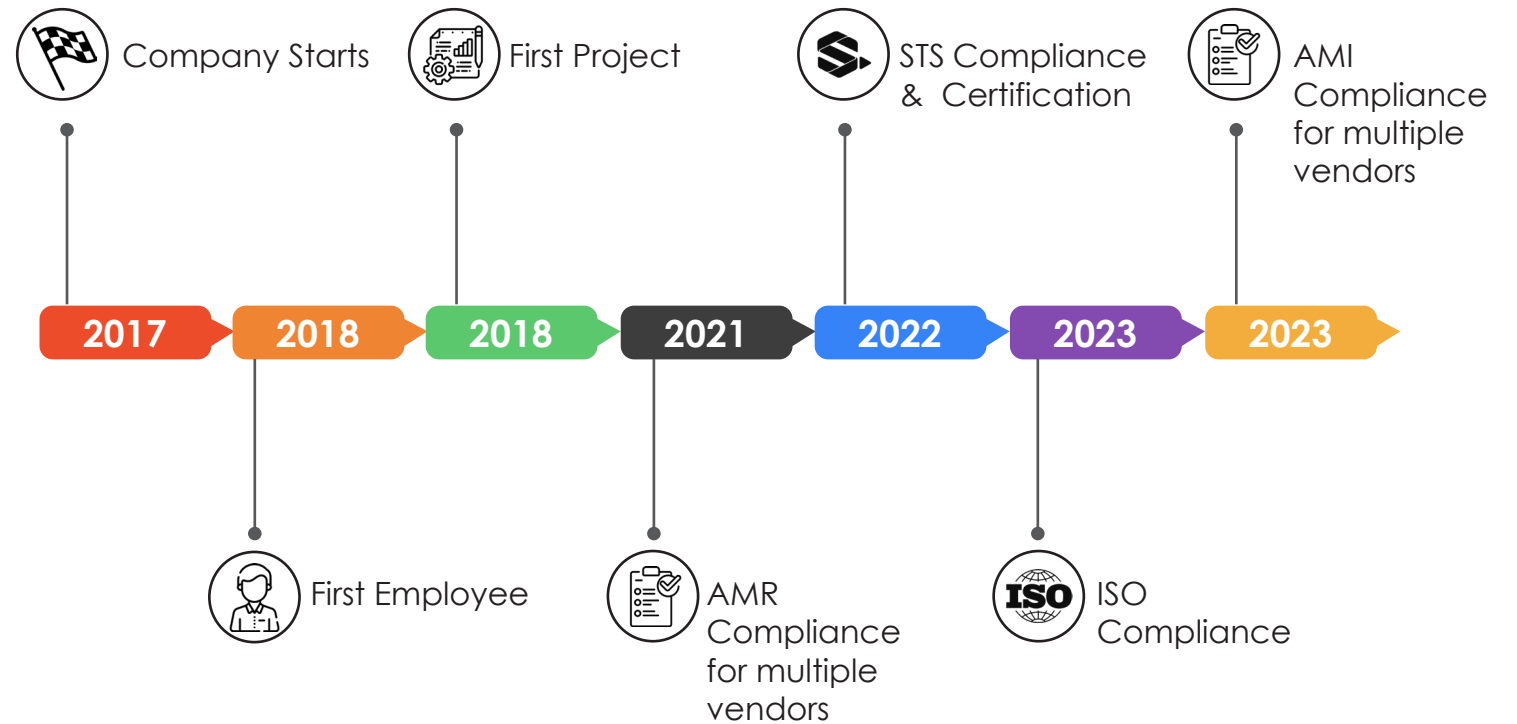

EXECUTIVE DIRECTORS

Equalizer's approach to governance is underpinned by its values. The company remains committed to the highest standards of governance, ethics and integrity. Thus, the Equalizer's board is responsible for determining the strategic direction of the company and exercising prudent control over the group and its affairs. The board and the individual directors will, at all times, act in the best interest of Equalizer and adhere to all relevant legal standards of conduct.

03

GOVERNANCE

Equalizer has always believed that strong governance practices are the foundation of a successful, well-run company. Ensuring that investors, customers, third parties and employees see it as a company with high ethical standards is important. Always striving to apply all principles of good governance in the King Code on Corporate Governance (King Code) it sets out what ethical and effective leadership is, therefore, closely connected to how the company operates.

The company is committed to continually reviewing policies and practices to ensure that high levels of good governance are sustained, which includes periodically reviewing the policies used to maintain good ethics.

If your data protection isn't disaster ready, it's a distant second

How we plan to respond during an emergency or other unexpected event drastically impact how quickly we can resume operations and its prospects for future success. Planning ahead and having systems in place for such events is as important as the actual response once an event occurs.

We have both business continuity plans and disaster recovery plans in place. While business continuity and disaster recovery plans are two separate types of plans, they complement each other as there are many similar concerns for each.

04

COMPLIANCE

We respect that the law (like POPI) requires us to give certain people access to information in certain circumstances. We recognise the importance of such a requirement because we believe that access to information is a powerful tool to ensure accountability and transparency.

Data remain the property of the customer.

VISION

Our mission is to be your partner for Sustainability and OPERATIONAL Efficiency. We drive RESULTS BY transformation AND integrating INDUSTRY-leading processes and technologies to realize the full efficiency and sustainability opportunities for your business

MISSION

To provide superior quality services that: CUSTOMERS recommend to OTHERS, EMPLOYEES are proud of, and INVESTORS seek for long-term relationships.

CORE VALUES

Integrity | Innovation | Commitment | Creativity
People | Passion | Goals | Growth | Connection
